INNOVATIVE SOLUTIONS FOR ARCHITECTURE AND CONSTRUCTION

With over 10 years experience, **SISBAUTEN** develops its activity through several business sectors, representing important premium brands and unique solutions for architecture and construction.

SISBAUTEN is an active player in several markets, mainly in the steel frame systems, sealing systems, specialized products for ventilated cladding facade and domotics.

The superior quality of our materials, innovation and attention to detail are part of the foundations that settle **SISBAUTEN**, as well as the unavoidable concern for the satisfaction of our customers, partners and teams.

The future depends on intelligent buildings.

We integrate systems in order to increase the efficiency of buildings, using highly developed technologies to reduce energy costs and maintenance.

RP-TECHNIK, being a company of the Welser group, is present in the international market as one of the largest manufacturers of steel systems for frames.

The effectiveness of the **RP-TECHNIK** systems is proven by the numerous projects already carried out globally, as well as by several official European laboratories that certify their quality and solutions.

The robustness, technique and nobility, allied to the uniqueness of the material, make **RP-TECHNIK** systems a reference in the current architecture, as well as in the recovery and preservation of old buildings.

The use of steel systems assumes an added value in your project.

SISTEMAS

RP-TECHNIK offers steel solutions for all types of doors, windows and curtain facade.

- Systems with thermal break
- Systems without thermal break
- Minimalist systems
- Firewall systems
- Anti-projectile systems
- Curtain facade

SWISS pearl®

SwissPearl® is a high-tech fiber cement composite panel, manufactured in Switzerland and marketed all over the world. Certified according to ISO 9001 and endowed with remarkable resistance to the elements, **SwissPearl®** panels have a life expectancy of more than 50 years.

The panels are divided into six different ranges and have more than 40 standard colors available.

GAMMA

- Carat
- Avera
- Reflex
- Sandblasted
- Nobilis
- Planea

We seal the doors.

For over 70 years **PLANET** drop down seals have ensured that doors without raised thresholds seal tight to the floor.

PLANET drop down seals adjust even crooked floors and uneven floors.

PLANET drop-down seals

For the following type of doors:

- single doors
- double doors
- sliding doors
- pivot doors
- folding doors
- wooden, metal, pvc and glass doors

Planet drop-down seals

+ SWISS MADE

PLANET also produces customized special drop-down seals for pivot-doors, sliding-doors, folding-doors, circular-doors, acoustic-doors, and radiation protection-doors.

Important features - valid for PLANET

- Seal height from 5mm up to 25mm
- Unilateral and soundless release, silent seal
- Can be shorted up to 100 mm and 125 mm (PLANET HS, KT, RH, RF, KG, MF, RO, PU)
- Lift height adjustment with allen key 3 mm
- Drop-down seals for wavy, buckled, hollow, bevelled and uneven floor
- Drop-down seals for double leaf foolding doors with flush bolt or diving bar

As a system partner for the international facade industry, Sisbauten has developed a new efficient fastening solution for various types of ventilated facade, namely that of Swisspearl represented by us.

It is intended as a fastening solution for any type of coating material and will be used as support for installers wishing to consider their own assembly solutions.

RANGE OF PRODUCTS

- Profiles;
- Brackets;
- Tubes;
- Glueingsystems;
- Cutting disks.

A **ESCO Metallbausysteme GmbH** was founded in 1965 and after several years of experience has gone from a simple accessory shop to a highly specialized company with an extensive portfolio of products.

Today, **ESCO Metallbausysteme GmbH** has its own accessory systems offering technological solutions for doors, windows and facades.

Its success is largely due to its insertion in the technological market and also to the professionalism of its employees.

ESCO is part of the VBH group, the market leader in the retail of accessories for all types of frames and openings.

The strength of VBH focuses on the accessories for wood and pvc / plastic. **ESCO** complements the group, covering all innovation for metal window frames.

- We cover a large commercial area, through continuously updated products;
- ESCO is an exclusive supplier of accessories for various brands of aluminum;
- ESCO develops and distributes a comprehensive field of proprietary products, including powertrains;
- Development of Special Accessories (mechanically or electrically operated) are developed under the scope and study of special projects at the Technology Center ESCO.

A new world of features for your home with a single app.

The **VITA Smart Home** system is specially designed for door and window safety. Together, the **VITA** components monitor and control the permitted accesses, as well as the closing of the windows. In case of attempted theft, the **VITA** gateway immediately sends messages to registered users.

The **VITA** screen shows whether windows and doors are open or closed before leaving home, helping you in your daily life.

Through a touch, control the ventilation and heating to adjust your home to your needs, even when you're out.

Smart security for windows and doors
